Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 8-12, in the reply filed on 12/23/04 is acknowledged.

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C.

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonora et al.

In regard to claim 8, the Bonora et al. reference discloses a high pressure "processing apparatus" (Figure 1) comprising a "processing vessel" 20 including a "processing chamber" 24, a "support member" 22, a "fluid feeding / discharging means" (Figure 3), a "communicating channel" 42, a "valve structural member" 40 and a "piping member" 34, as claimed.

In regard to claim 9, the "piping member" 34 is capable of being used under atmospheric pressure.

In regard to claim 10, the "fluid feeding means" (Figure 3) includes a "fluid feeding channel" 44, a "valve structural member" 40 and "piping member" 34, as claimed.

In regard to claim 11, see "fluid feeding hole" 62 (see Figures 3 and 5) formed in the "valve member" 40.

In regard to claim 12, see "reservoir section" 84.

In regard to claims 8-12, the introductory statement of intended use and all other functional statements have been carefully considered but are deemed not to impose any structural limitations on the claims distinguishable over the Bonora et al. device, which is further capable of feeding and discharging high pressure and corrosive fluids through valve 40. Whether the device was actually used in such a manner is dependent upon the performance or non-performance of a future act of use and not upon a particular structural relationship set forth in the claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Miyajima and Fosnight et al. references pertain to various smif pod processing chambers, similar to Applicant's device.
